Progress yang sudah dilakukan

A. FRONTEND

1. Kode untuk HTML

```
Project.html / <html / > <body / > <maincontainer / > <sectioncardrole-card / > <formregisteronform / > <divrow / >
2 <html lang="id">
9 <body>
10 <main class="container">
11 <section class="card role-card">
19
20 <form id="registerForm" class="form novalidate">
21 <div class="row">
22 <label for="name">Nama lengkap</label>
23 <input id="name" name="name" type="text" required />
24 </div>
25
26 <div class="row">
27 <label for="email">Email</label>
28 <input id="email" name="email" type="email" required />
29 </div>
30
31 <div class="row">
32 <label for="phone">No HP</label>
33 <input id="phone" name="phone" type="tel" pattern="[0-9+ ]{6,20}" />
34 </div>
35
36 <div class="row">
37 <label for="password">Password</label>
38 <input id="password" name="password" type="password" minlength="6" required />
39 </div>
40
41 <div id="techFields" class="collapsible" aria-hidden="true">
42 <h3 class="sub">Data Toko / Teknisi</h3>
43
44 <div class="row">
45 <label for="shop_name">Nama Toko</label>
46 <input id="shop_name" name="shop_name" type="text" />
47 </div>
48
49 <div class="row">
50 <label for="operating_hours">Jam Operasional</label>
51 <input id="operating_hours" name="operating_hours" type="text" placeholder="08:00-17:00" />
52 </div>
53
54 <div class="row">
55 <label for="skills">Keahlian (pisahkan dengan koma)</label>
56 <input id="skills" name="skills" type="text" placeholder="komputer,kulkas,mesin cuci" />
57 </div>
58
59 <div class="row">
60 <label for="docs">Dokumen Verifikasi (PDF/JPG/PNG)</label>
61 <input id="docs" name="docs" type="file" accept=".pdf,image/*" />
```

2. Style CSS

```
# ProjectCSS / 17 @media (max-width:600px)
1  :root{
2    --bg: #f5f7fb;
3    --card: #ffffff;
4    --accent: #0066ff;
5    --muted: #6b7280;
6    --radius: 12px;
7    --pad: 10px;
8    --maxw: 1000px;
9    --shadow: 0 6px 18px 0 rgba(13, 30, 59, .08);
10   font-family: Inter, system-ui, -apple-system, "Segoe UI", Roboto, "Helvetica Neue", Arial;
11 }
12
13 *{box-sizing: border-box}
14 html, body{height: 100%}
15 body{
16   margin: 0;
17   background: linear-gradient(180deg, #eef2ff 0%, var(--bg) 100%);
18   display: flex;
19   align-items: center;
20   justify-content: center;
21   padding: 32px;
22   color: #0f172a;
23 }
24
25 .container{
26   width: 100%;
27   max-width: var(--maxw);
28   display: grid;
29   grid-template-columns: 1fr 420px;
30   gap: 20px;
31   align-items: start;
32 }
33
34 /* Card */
35 .card{
36   background: var(--card);
37   border-radius: var(--radius);
38   padding: var(--pad);
39   box-shadow: var(--shadow);
40 }
41
42 /* Role toggle */
43 .role-toggle{
44   display: flex;
45   gap: 8px;
46   margin: 12px 0 18px;
47 }
48
49 role{
```

3. Logic JS

```

15 Proyekjs > document.addEventListener('DOMContentLoaded') callback
1 document.addEventListener('DOMContentLoaded', () => {
2   const roleCustomerBtn = document.getElementById('role-customer');
3   const roleTechBtn = document.getElementById('role-tech');
4   const techFields = document.getElementById('techFields');
5   const docsInput = document.getElementById('docs');
6   const docsPreview = document.getElementById('docsPreview');
7   const form = document.getElementById('registerForm');
8   const googleBtn = document.getElementById('googleBtn');
9
10  let selectedRole = 'customer';
11
12  // Fungsi untuk set role dan tampilkan/hidden field teknisi
13  function setRole(role){
14    selectedRole = role;
15    if(role === 'technician'){
16      techFields.style.display = 'block';
17      techFields.setAttribute('aria-hidden', 'false');
18      roleTechBtn.classList.add('active');
19      roleCustomerBtn.classList.remove('active');
20      roleTechBtn.setAttribute('aria-checked', 'true');
21      roleCustomerBtn.setAttribute('aria-checked', 'false');
22    } else {
23      techFields.style.display = 'none';
24      techFields.setAttribute('aria-hidden', 'true');
25      roleCustomerBtn.classList.add('active');
26      roleTechBtn.classList.remove('active');
27      roleCustomerBtn.setAttribute('aria-checked', 'true');
28      roleTechBtn.setAttribute('aria-checked', 'false');
29    }
30  }
31
32  roleCustomerBtn.addEventListener('click', () => setRole('customer'));
33  roleTechBtn.addEventListener('click', () => setRole('technician'));
34
35  // Preview nama file dokumen
36  docsInput?.addEventListener('change', (e) => {
37    const f = e.target.files && e.target.files[0];
38    docsPreview.textContent = f ? `File: ${f.name}` : '';
39  });
40
41  // Submit form registrasi
42  form.addEventListener('submit', async (evt) => {
43    evt.preventDefault();
44
45    const name = document.getElementById('name').value.trim();
46    const email = document.getElementById('email').value.trim();
47    const password = document.getElementById('password').value.trim();
48

```

5. Authorisasi JS

```
1  const express = require('express');
2  const bcrypt = require('bcrypt');
3  const multer = require('multer');
4  const db = require('../db');
5  const router = express.Router();
6
7  const upload = multer({ dest: 'uploads/' }); // folder lokal untuk simpan dokumen
8
9  router.post('/register', upload.single('docs'), async (req, res) => {
10    try {
11      const {
12        name, email, phone, password, role,
13        shop_name, operating_hours, skills
14      } = req.body;
15
16      if (!name || !email || !password || !role) {
17        return res.status(400).json({ message: 'Data wajib belum lengkap' });
18      }
19
20      // Enkripsi password
21      const hashed = await bcrypt.hash(password, 10);
22
23      // Simpan ke tabel users
24      const userRes = await db.query(`
25        INSERT INTO users (name, email, phone, password_hash, role)
26        VALUES ($1, $2, $3, $4, $5) RETURNING id
27      `, [name, email, phone, hashed, role]);
28
29      const userId = userRes.rows[0].id;
30
31      // Jika teknisi, simpan ke tabel technicians
32      if (role === 'technician') {
33        const filePath = req.file?.path || null;
34        await db.query(`
35          INSERT INTO technicians (user_id, shop_name, operating_hours, skills, verification_docs)
36          VALUES ($1, $2, $3, $4, $5)
37        `, [userId, shop_name, operating_hours, skills, filePath]);
38      }
39
40      res.status(201).json({ message: 'Registrasi berhasil', user_id: userId });
41    } catch (err) {
42      console.error('✖ Error registrasi:', err);
43      res.status(500).json({ message: 'Gagal registrasi' });
44    }
45  });
46
47  module.exports = router;
```

6. Server JS

```

backend-servis > JS server.js > ...
1 // 🚀 Inisialisasi dan konfigurasi
2 console.log('🚀 Memulai server...');
3 require('dotenv').config();
4 const express = require('express');
5 const cors = require('cors');
6 const app = express();
7
8 // 🛠 Middleware
9 app.use(cors());
10 app.use(express.json());
11 app.use(express.urlencoded({ extended: true }));
12
13 // 📦 Routing
14 const authRoutes = require('./routes/auth');
15 app.use('/api/auth', authRoutes);
16
17 // 🌐 Port dan Host
18 const PORT = process.env.PORT || 4000;
19 const HOST = '127.0.0.1';
20
21 // ▶ Jalankan server
22 app.listen(PORT, HOST, () => {
23   console.log(`✅ Server berjalan di http://${HOST}:${PORT}`);
24 });

```

7. DB JS

```

backend-servis > JS db.js > ...
1 const db = require('./db');
2
3 (async () => {
4   const res = await db.query('SELECT NOW()');
5   console.log('Koneksi berhasil:', res.rows[0]);
6 })();

```

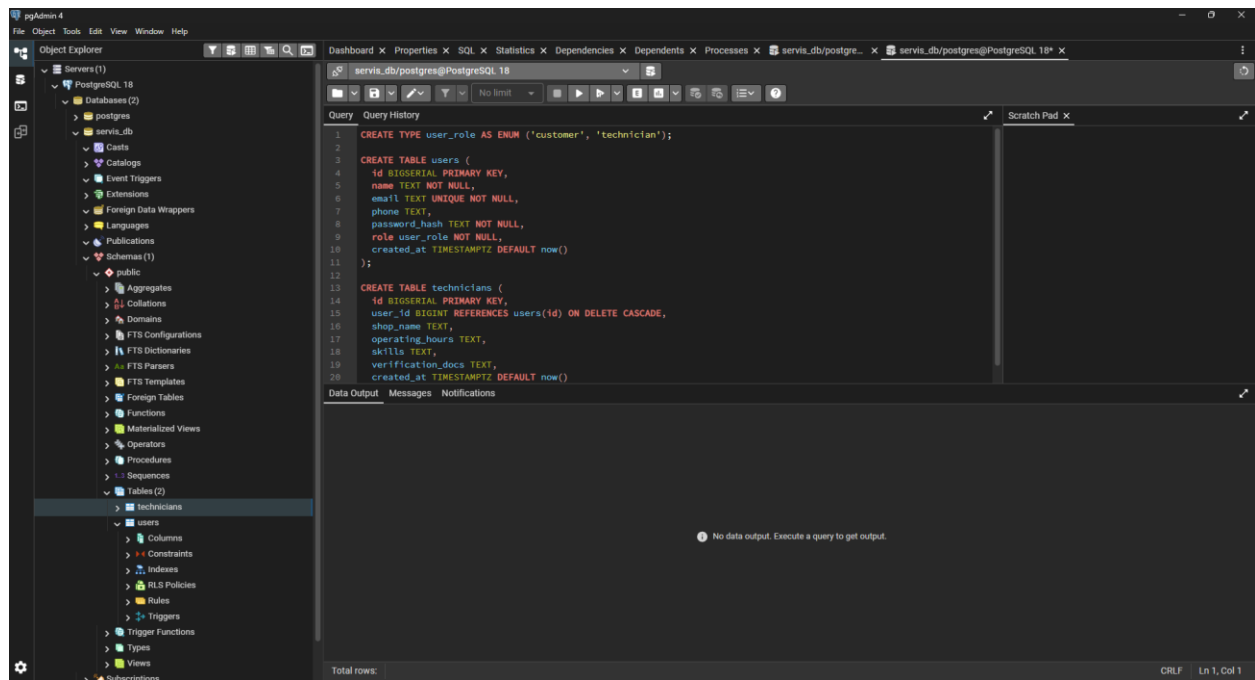

8. ENV JS

```

backend-servis > .env
1 DATABASE_URL=postgres://postgres:JoeTobing29*4@localhost:5432/servis_db
2 PORT=4000

```

9. Database menggunakan Postgresql
